COMMUNITY & Sustainability

With nature as our closest neighbor, sustainability and eco-friendly is a critical part of our resort. We use solar powered energy, harvest rainwater creating bio gas for onsite use, and make own biodegradable signature toiletries. We support the community school and health post as well as managing our own charitable work under Right4Children and The Pavilions Foundation. Working together with our local community, our goal is to employ 50% of the local village, and assist the rest of the 50% learn skills to develop their own businesses and farms.
